

# Anti-reflective Coating Solar Glass

**The “MORE”, The Better**

*New*

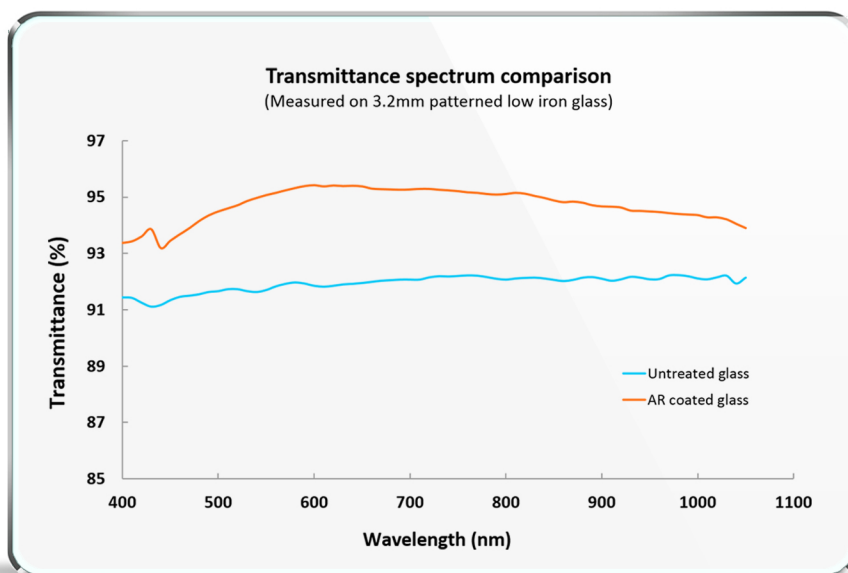

*Transmittance Improvement  $\geq 3\%$*

## ***MORE Series***

- MORE light transmittance above 3%.
- Easy cleaning property with uniquely formulated stain repellent nano coating.
- Precisely tuned refractive index and film thickness designed for the best optical performance.
- Strong chemical bonding between the glass and coating guarantees the best coating adhesion.
- State of the art nano coating technology developed since 2006.

**Almaden®**

## Reliability test:

Test	Exp. Cond. Based On	Standard( $\Delta T$ )	Result
Damp Heat	IEC 61215-2005	<1%	Pass
Thermal Cycle	IEC 61215	<1%	Pass
Humidity Freeze	IEC 61215	<1%	Pass
UV Exposure	IEC 61215	<1%	Pass
Salt Spray	EN 1096-2	<1%	Pass
Acid Resistance	ISO 2812-1:2007	<1%	Pass
Washability Test	ISO 11998:2006	<1%	Pass

## Physical properties:

Transmittance gain	$\geq 3\%$	At normal incidence with AAA light source
Hardness	>4H	
Appearance	Transparent with light blue color
